Education

2021 - 2025 **Ph.D. in Applied Mathematics.** Illinois Institute of Technology (IIT).

2017 - 2021 **Master of Data Science.** IIT. Summa cum laude.

2017 - 2021 **B.S. in Applied Mathematics, Minor in Computer Science.** IIT. Summa cum laude.

Experiences

Summer 2023 **Graduate Intern** at **Los Alamos National Laboratory.** I modeled the solution processes of PDEs with random coefficients using efficient and error aware Gaussian processes resulting in [3].

Summer 2022 **Givens Associate** at **Argonne National Laboratory**. I researched methods to efficiently estimate failure probability using Monte Carlo with non-parametric importance sampling resulting in [2].

Summer 2021 **Machine Learning Engineer** at **SigOpt, an Intel Company**. I developed novel meta-learning techniques for model-aware hyperparameter optimization resulting in [6].

2018 - Present **Lead Developer** of **QMCPy: A Quasi-Monte Carlo Python Library.** This package provides researchers and practitioners with high quality sequence generators, automatic variable transformations, adaptive stopping criteria algorithms, and diverse use cases. See [4, 7, 8] or visit *qmcpy.org*.

Fall 2021 - Present **Teaching assistant** at **IIT**. Includes leading review sessions for Ph.D. qualifying exams.

Fall 2022 **Participant** in an elective course on **AI Driven Science on Supercomputers** through **Argonne National Laboratory**. Coursework at *github.com/alegresor/ai-science-training-series*.

2018 - 2021 **Lead Developer** of **DNNB: The Deep Neural Network Builder in Python.** This research package implements deep learning models from scratch in Python. See *github.com/alegresor/DNNB*.

2018 - Present **Administrative Assistant** for **The Center for Interdisciplinary Scientific Computation at IIT**. I scheduled lecture series and maintained information on the CISC website at *cos.iit.edu/cisc/*.

2018 - 2019 **Instructor** for the **STARS Computing Corp's Computer Discover Program.** I developed a curriculum for middle school and high school girls to learn programmatic thinking with Python.

Coursework

Mathematics — Applied Analysis I/II, Computational Mathematics, Probability, Statistics, Applied Statistics, Bayesian Computational Statistics, Statistical Learning, Monte Carlo Methods in Finance, Mathematical Methods for Algorithmic Trading, Numerical Methods for PDEs, Reliable Mathematical Software, Linear Optimization, Computational Algebraic Geometry

Computer Science — Big Data Technologies, Data Preparation and Analysis, Database Organization, Big Data Visualization, Systems Programming, Computer Organization and Assembly, Data Structures and Algorithms, Object Oriented Programming I/II.

Awards

2017 - Present **Deans List Member**, IIT.

2023 **Outstanding Mathematics Poster**, Los Alamos National Laboratory.

2021 **Travel Award**, SIAM CSE.

2021 **Best Manuscript**, IIT Undergraduate Research Journal.

2020 **College of Science Summer Stipend**, IIT.

2020 **Karl Menger Student Award for Exceptional Scholarship**, IIT.
