in aleksei-sorokin • alegresor • q9O8NFkAAAAJ • US Citizen

Research Scientific Machine Learning, Gaussian Processes, Quasi-Monte Carlo, Probabilistic Numerics

Programming Python (PyTorch, GPyTorch, Pandas, Matplotlib), Julia, C, MATLAB, R, SQL, Wolfram

Tools AWS (SageMaker, EC2), GitHub (Actions, Pages), L^AT_EX, Docker

Education

2026.01 – 2028.05 **Postdoc in Statistics**. University of Chicago (UChicago). Advisors *Yuehaw Khoo and Lek-Heng Lim*.

2021.08 – 2025.12 **PhD in Applied Math**. Illinois Institute of Technology (IIT). GPA 3.89/4. Advisor *Fred J. Hickernell*.

2017.08 – 2021.05 **Master of Data Science**. IIT. Summa Cum Laude. GPA 3.94/4.

2017.08 – 2021.05 **B.S. in Applied Math, Minor in Computer Science**. IIT. Summa Cum Laude. GPA 3.94/4.

Experiences

2025.01 – 2025.12 **DOE SCGSR Fellow in Applied Math at Sandia National Laboratories**, Livermore, CA. I produced scientific ML models for machine-precision solutions to nonlinear PDEs [1]. I developed scalable multifidelity Gaussian process regression models and open-source software implementations [10, 11, 6].

2021.08 – 2025.01 **Teaching Assistant at IIT**. I led reviews for PhD qualifying exams in analysis and computational math.

2024.05 – 2024.08 **Scientific Machine Learning Researcher at FM (Factory Mutual Insurance Company)**. I deployed scientific ML models, including PINNs and DeepONets, to accelerate CFD fire simulations [13].

2023.05 – 2023.08 **Graduate Intern at Los Alamos National Laboratory**. I modeled multifidelity solutions to PDEs with random coefficients using efficient and error-aware Gaussian process regression models [14].

2022.09 – 2022.11 **Participant in Argonne National Laboratory's Course on AI-Driven Science on Supercomputers**. Key topics included handling large-scale data pipelines and parallel training for neural networks.

2022.05 – 2022.08 **Givens Associate Intern at Argonne National Laboratory**. I derived error bounds and a sequential sampling method for efficiently estimating failure probabilities with probabilistic models [5].

2021.05 – 2021.08 **ML Engineer Intern at Intel (formerly SigOpt)**. On a six-person ML team, I contributed production code for meta-learning model-aware hyperparameter tuning via Bayesian optimization [18].

2018.05 – 2019.08 **Instructor of the Computer Discovery Program, STARS Computing Corps at IIT**. I taught and developed curriculum for middle school and high school girls to learn programmatic thinking in Python.

Open-Source Software

QMCPy Quasi-Monte Carlo Python Software (qmcsoftware.org/qmcpy). I led dozens of collaborators across academia and industry to develop QMC sequence generators, automatic variable transformations, adaptive error estimators, and diverse use cases [4, 8, 9, 12, 19, 15, 20, 2, 3].

FastGPs Scalable Gaussian Processes in Python (alegresor.github.io/fastgps). FastGPs pairs lattice/digital-net designs with matching shift-invariant kernels, reducing GP costs from $\mathcal{O}(n^3)$ time and $\mathcal{O}(n^2)$ storage to $\mathcal{O}(n \log n)$ time and $\mathcal{O}(n)$ storage. This supports GPU scaling, batched inference, hyperparameter optimization, multifidelity GPs, and efficient Bayesian cubature [11, 10, 6].

TorchOrthoPolys Orthogonal Polynomials in PyTorch (alegresor.github.io/TorchOrthoPolys) with GPU support.

QMCToolsCL Randomized Quasi-Monte Carlo Sequences in C/OpenCL (qmcsoftware.org/QMCToolsCL).

QMCGenerators.jl Randomized Quasi-Monte Carlo Sequences in Julia (alegresor.github.io/QMCGenerators.jl).

Awards

2025.01 – 2025.12 **DOE SCGSR Fellow in Applied Math**, Sandia National Laboratories, Livermore, CA.

2025.01 **Karl Menger Student Award for Exceptional Scholarship (Graduate)**, IIT.

2024.01 **College of Computing Excellence in Dissertation Research**, IIT.

2024 **Teaching Assistant Award**, IIT.

2023.08 **Outstanding Math Poster**, Los Alamos National Laboratory.

2017.08 – 2025.05 **Dean's List Member**, IIT, every semester.

References

PhD Advisor **Fred J. Hickernell** (hickernell@illinoistech.edu) Professor of Applied Math, IIT.

Fellowship Mentor **Pieterjan M. Robbe** (pmrobbe@sandia.gov) Senior Member of Technical Staff, Sandia National Labs.

Postdoc Mentor **Yuehaw Khoo** (ykhoo@uchicago.edu) Assistant Professor, Department of Statistics, UChicago.

Postdoc Mentor **Lek-Heng Lim** (lekheng@uchicago.edu) Professor, Department of Statistics, UChicago.
